## Human Papillomavirus and Related Cancers, Fact Sheet 2017 (2017-04-19)

### I. Key data on HPV and HPV-related cancers

San Marino has a population of 14,601 women ages 15 years and older who are at risk of developing cervical cancer. Data is not yet available on the HPV burden in the general population of San Marino.

However, in Southern Europe, the region San Marino belongs to, about 3.2% of women in the general population are estimated to harbour cervical HPV-16/18 infection at a given time, and 68.0% of invasive cervical cancers are attributed to HPVs 16 or 18.
